

# **FACTORS AFFECTING THE ACTIVENESS OF KADER POSYANDU**

**Firyal Yasmin**

**Department of Nutrition, High School of  
Health Sciences (Stikes) Husada Borneo  
Banjarbaru, South Kalimantan**

# BACKGROUND

- Posyandu is a health care organized by and for the community. Posyandu activity is influenced by several factors, among others, are factors Posyandu builder, Kader Posyandu itself and Posyandu users. One of the problems associated with the activity in Posyandu activities is the participation of kader, the kader whereas today the numbers have started to drop out is high. Data March 2012 states that there are 159 kader Posyandu in the Puskesmas Dalam Pagar catchment area, but only 136 are active.

# METHOD

- This study is an analytical research using cross sectional study, with the population all kader Posyandu in The Puskesmas Dalam Pagar cathment area, total sample is 101 people with a random sampling method

# RESULT

# CORRELATION BETWEEN EDUCATION AND THE ACTIVENESS OF KADER POSYANDU

Education	Activeness		Total
	Active	Not Active	
≤ Junior High School	31	16	47
	66,0%	34,0%	100%
> Junior High School	48	6	54
	88,9%	11,1%	100%
Total	79	22	101
	78,2%	21,8%	100%

- ▶ There is a significant correlation between education and the activeness of kader

$(p = 0,000), p < (\alpha = 0,05)$

kader with higher levels of education tend to be more active

# CORRELATION BETWEEN AGE AND THE ACTIVENESS OF KADER POSYANDU

Age	Activeness		Total
	Active	Not Active	
< 30 years	5	20	25
	20,0%	80,0%	100%
≥ 30 years	74	2	76
	97,4%	2,6%	100%
Total	79	22	101
	78,2%	21,8%	100%

- ▶ There is a significant correlation between age and the activeness of kader

$(p = 0,000), p < (\alpha = 0,05)$

kader with the age  $\geq 30$  years old tend to be more active

# CORRELATION BETWEEN EXPERIENCE AND THE ACTIVENESS OF KADER POSYANDU

Experience	Activeness		Total
	Active	Not Active	
≤ 5 years	29	16	45
	64,4%	35,6%	100%
> 5 years	50	6	56
	89,3%	10,7%	100%
Total	79	22	101
	78,2%	21,8%	100%

- ▶ There is a significant association between experience and the activeness of kader

$(p = 0,003), p < (\alpha = 0,05)$

kader who have experience of  $> 5$  years tend to be more activeness of kader

# CORRELATION BETWEEN EMPLOYED STATUS AND THE ACTIVENESS OF KADER POSYANDU

Employed status	Activeness		Total
	Active	Not Active	
Working	47	6	53
	88,7%	11,3%	100%
Not Working	32	16	48
	66,7%	33,3%	100%
Total	79	22	101
	78,2%	21,8%	100%

- ▶ Kader which are employed tend to be more active

$(p = 0,009), p < (\alpha = 0,05)$

although Kader working but they can arrange the best possible time, and their work in Posyandu they can still do well

○ THANK YOU
