Knowledge brokering: exploring the process of transferring knowledge into action

Pembahasan oleh:
Laksono Trisnantoro
Pusat Kebijakan dan Manajemen Kesehatan FK/UGM,
Bagian IKM FK UGM

Mengapa ada kata “broker”

Kata lain adalah

- Knowledge transfer
- Translational

- **Adanya gap antar peneliti dengan pihak yang menggunakan hasil penelitiannya**
- **Masing-masing mempunyai keyakinan dan perilaku sendiri**

Kata lain: Translational Research

- Translational research merupakan sebuah pemahaman menarik mengenai bagaimana tindakan klinis dipergunakan dari hasil penelitian dasar. Selanjutnya, dari tindakan klinis akan dijadikan bahan kebijakan untuk aplikasi praktis di masyarakat.

Knowledge Brokering

The Job:

- To facilitate the transfer of research and other evidence between researchers and decision makers
- Human force behind knowledge transfer whose tasks include finding, assessing, and interpreting evidence facilitating interaction, and identifying research questions.

Three different approaches:

- Knowledge Managers
- Focus on the interface between “creators” and “users”.
- Enhance access to knowledge by providing training to knowledge users

Issues:

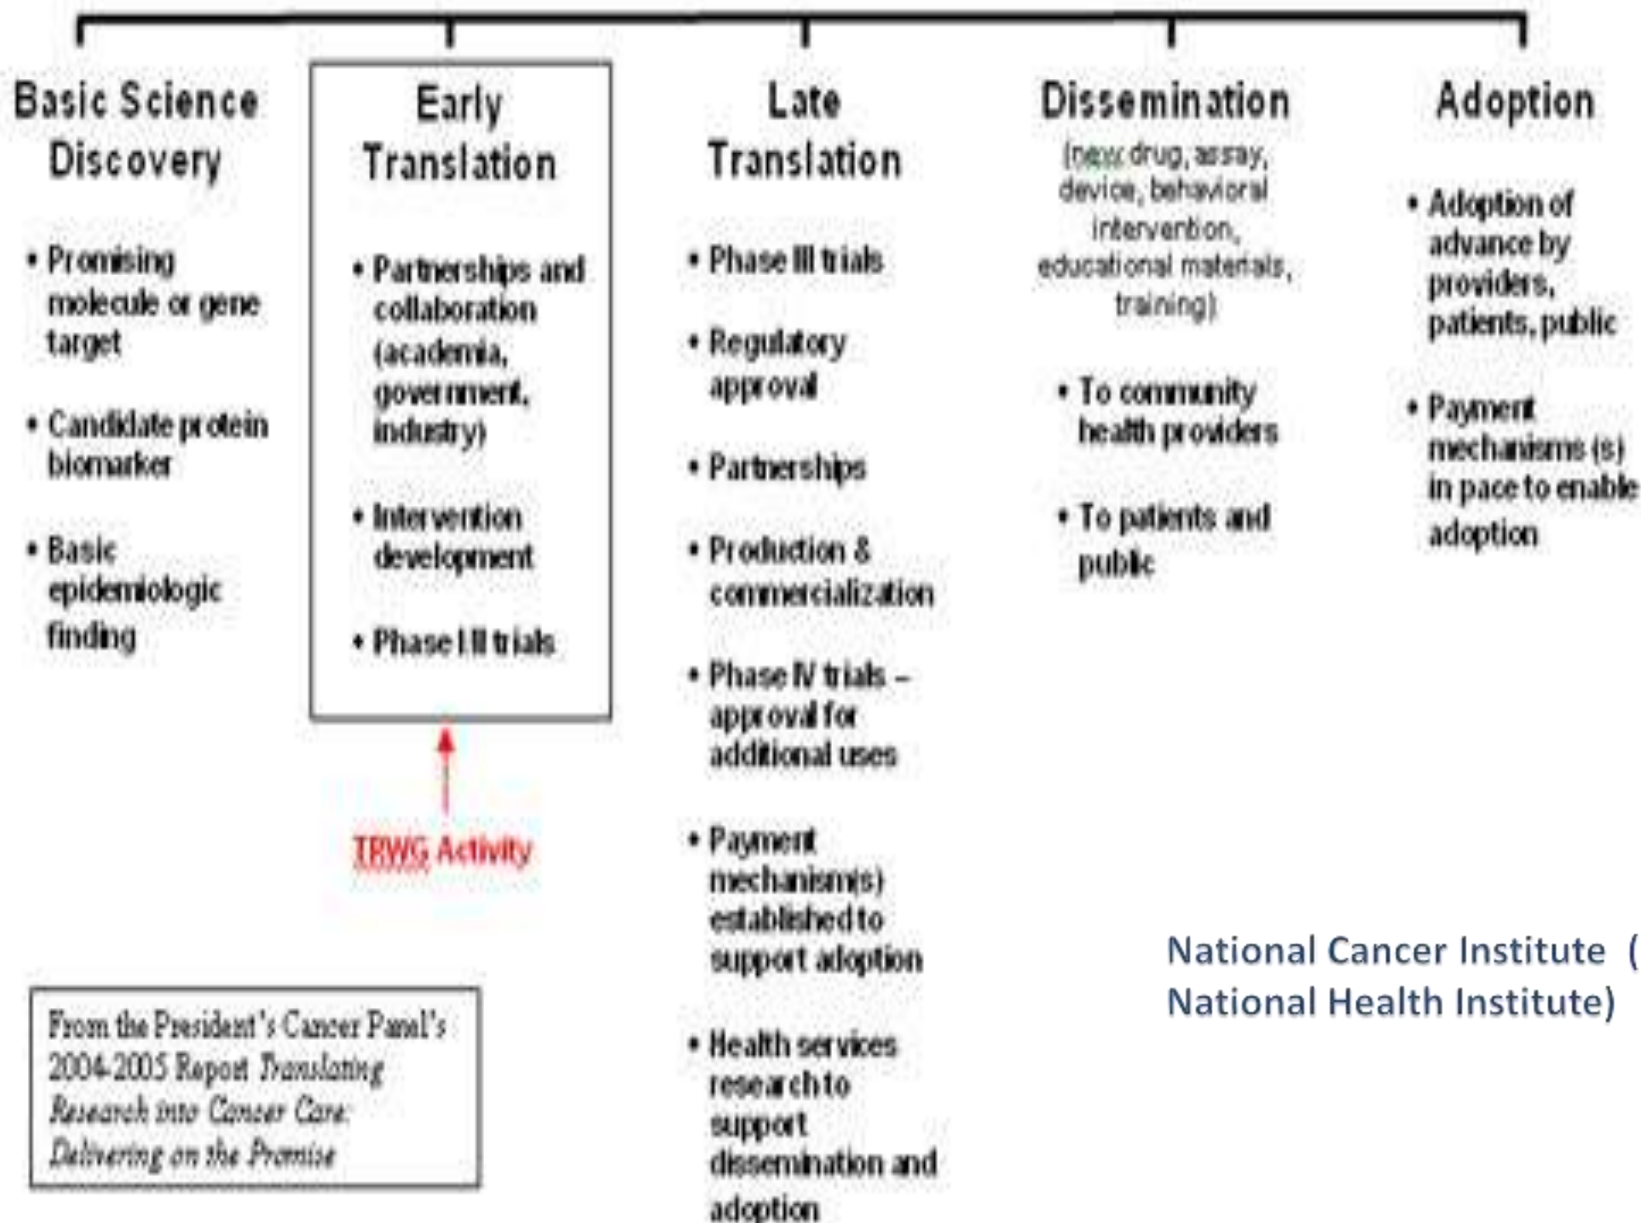

- Show mixed effects on the rate at which evidence is translated into action;
- Little attention to broad explanations of the process of transferring knowledge into action;
- Do not know much about the process involved in different knowledge transfer intervention.
- Lack of of suitable tools for planning and evaluating knowledge transfer activities.

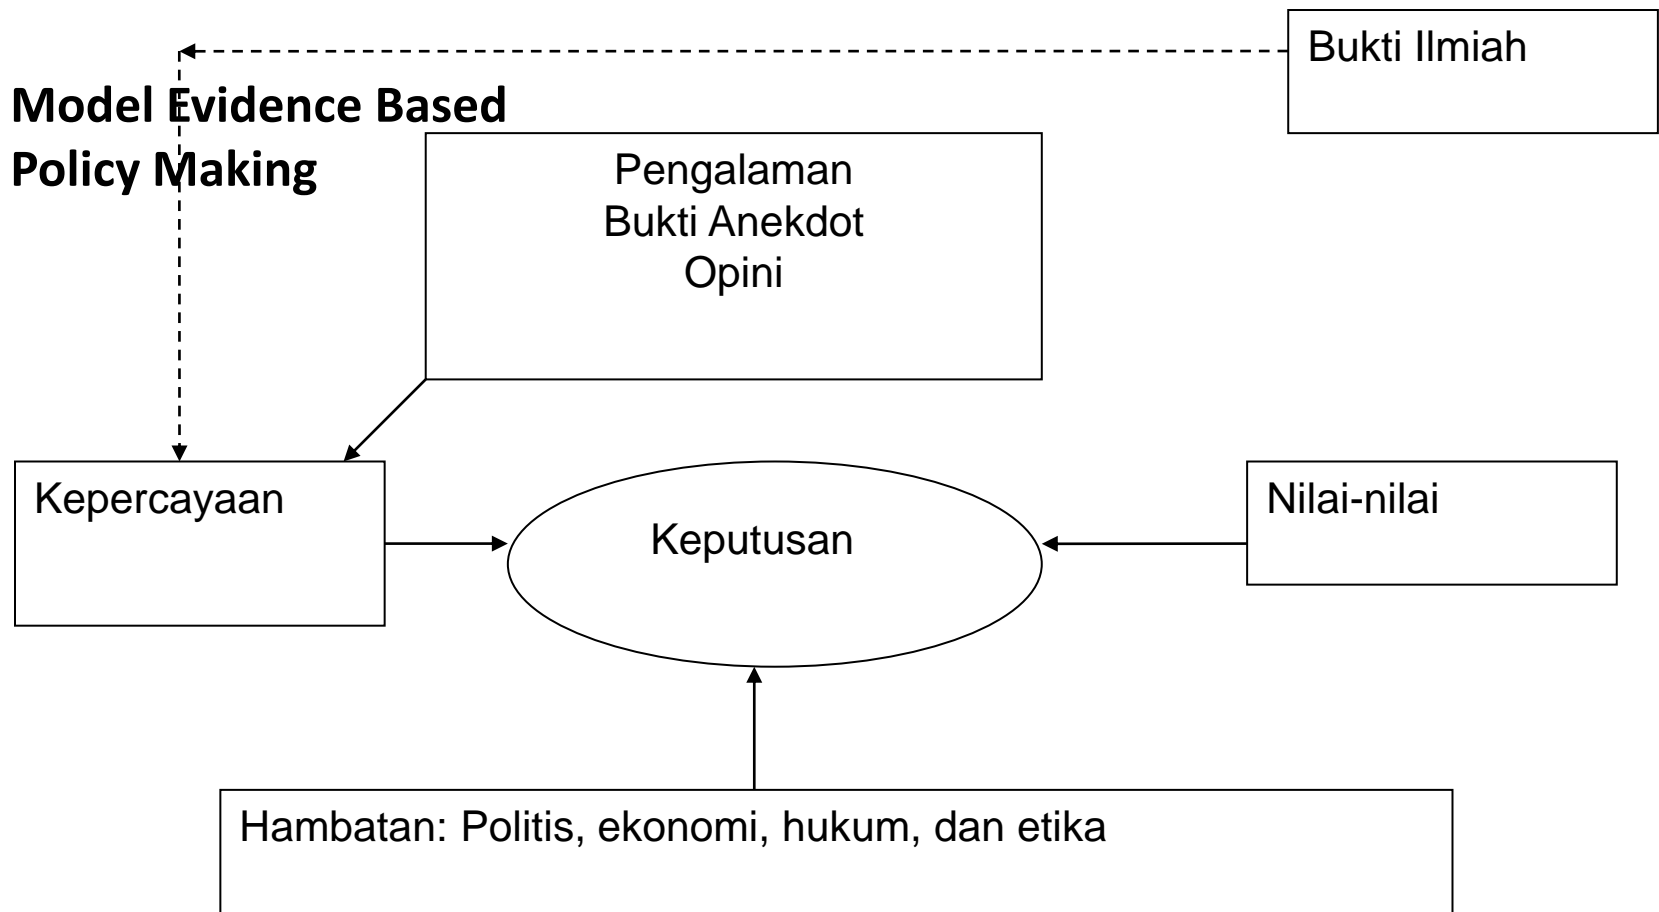

Contoh Gambaran dari paper lain:

- *Translational research transforms scientific discoveries arising from laboratory, clinical, or population studies into clinical applications to reduce cancer incidence, morbidity, and mortality."*

National Cancer Institute (US National Health Institute)

The Translational Continuum

**Cookson R. Evidence-based policy making in health care:
what it is and what it isn't. Journal of Health Service Research
Policy. Vol 10 No 2 April 2005**

Maksud dan Tujuan Penelitian

- To Clearly describe the processes involved in a knowledge brokering intervention; and
- to produce a framework of knowledge process which can be used for planning an evaluating knowledge transfer activities.

Kerangka Konsep:

- A complex social activity which involves the activity of many communities
- Influenced and moulded by the belief system and analytical/creative instincts of potential users and encompasses the reinvention, proliferation, reimplementation of ideas
- The fluid engagement of multiple entrepreneurs etc...

Methods and Design

Three Phases:

- Phase 1: Theoretical framework;
- Phase 2: Fieldwork;
- Phase 3: Data Analysis and Synthesis

☐ Pembahasan:

- Apakah kita perlu membuat penelitian ini di PKMK?
- Terkait dengan pengembangan berbagai web.
- Apakah ada sumber dana untuk menjadi knowledge broker?
